The Seacoast Artist Guild of South Carolina

Welcome to summer art for children presented by Laverne Davis of the Seacoast Artist Guild of South Carolina. Mrs. Davis is excited to share her talents with you. She is an award winning artist and mother of the extremely talented Maryanne Davis, a professional artist who is featured in many galleries and museums throughout the country. There is an artist in everyone of us. We start with crayons and paper when we are young and move on to watercolors, pastels, oil, acrylics and other mediums. Some of us become photographers, glass artists, plein air artists, sketch artists, 3D artists, and many other types. Some of us doodle on any piece of paper we have in front of us. This too is art. So is graffiti and sidewalk chalk art. We hope that you enjoy your time here whatever it may be and that you leave here with a feeling that you have learned something new and that you have been able to express yourself through your drawing, painting, or whatever it is that makes you happy.
